ESSAY

Covid 19, has left the everlasting effect in the world. During Pandemic, when many things become inaccessible for the people. The human mind come with the solution to get rid of these this crises. At that time, the evolve of technology took place, where many things shift towards the online platform like e-payment, online banking, online shopping. In the same manner, when educational institutes are shut down due to pandemic. Online education come into rescue, many students which are send back to their home country. Completed their education through online platform, Primary and Secondary ^{students} classes resume their classes. Instead of giving students an year gap, the online education ensure that learning remain continuous. But this model, took another turn in the post pandemic

Time period: when people all around the world get familiarize with the online education and took this as an opportunity. Now a days, many students are enrolled in the international schools through their online LMS system. Similarly, top ranked university introduced their courses for the students, professionals to upgrade their skills like harvard leadership course in coursera, google digital marketing course. People became so adapted to this that they start prioritizing online education ^{that} ~~that~~ ^{gradually} ~~gradually~~ over the traditional classroom education.

In future, it seems like online education is taking piece of traditional classroom in a very unstructive manner.
