

Title: The role of Green Spaces in a Society.

Amidst bustling cities, urban green spaces play a crucial role in providing relaxation. Additionally, it also provides home to the animals and is center ground for the local communities' social gatherings. This association also contributes to the well-being of the environment and the society. However, due to rapid increase in urbanisation, it is crucial to maintain balance between preservation of the trees and urbanization as sustainable urban planning is essential to integrate green spaces into urban development.
