

"DO NOT WASTE WATER EVEN IF YOU WERE AT A RUNNING STREAM"

1. INTRODUCTION

- a) Contextual Relation of Prophet's Saying to Modern day Global Water Crisis.
- b) Thesis Statement

2. GLOBAL WATER CRISIS

- a) No Access to clean water - Unesco Reports
- b) Frequency of Floods and Droughts due to climate change.
- c) World Economy at risk.
- d) Response of International Organizations to mitigate the effects of Water Crises.

3. PAKISTAN'S ACUTE WATER CRISIS

- a) Agriculture - Largest sector of Pakistan's economy - at risk.
- b) "The dependence on the Indus is the greatest danger to Pakistan is - the long term." — Anatol Lieven; Pakistan, a land country.
- c) Local population affected due to unsafe drinking water.

3(i) Root Causes for Pakistan's Water Crisis

- a) Rapid population growth and unplanned urbanization.
- b) Climate change bringing disastrous floods and droughts.
- c) Inefficient infrastructure and Water Pollution.
- d) Dependence on Single River System.
- e) Poor water management.

3(ii) Way Forward for Pakistan

- a) Political ownership of the challenge.
- b) Policy reforms and governance.
- c) Recycling of waste water.
- d) Increasing agricultural efficiency by use of Modern Technology.
- e) Population Control.

4) CONCLUSION

Date: _____

Thesis Statement:

The threat of water crisis is eminently growing in the World at large and Pakistan in specific. Pakistan — ranked 14th among 17 extremely high baseline water stressed countries — presents a pressing environmental and socio-economic challenge, exacerbated by multiple factors.
