

M T W T F S
Make a precis of the following Passage
and suggest a suitable title.

Pursuing Peace In Nuclear Era.

In a world where nuclear weapons have unprecedented, destructive power, total war no longer makes sense, as the consequences would devastate the environment and future generations. The vast resources spent on nuclear weapons to deter their use reflect the costly and irrational means of maintaining peace. True peace should be the rational aim of humanity, though it may lack the drama of war. The pursuit of world peace requires an enlightened attitude not only from perceived hostile nations but also from ourselves. Believing in the possibility of peace, rather than resigning to war as inevitable, is crucial. By redefining our vision of peace as achievable, we can inspire hope and move toward a world free from the threat of war.

Questions / Answers.

1: What is drought and what are its consequences?

Ans: Drought is a period when no rainfall for weeks occur, when streams and rivers dried up, cattle died from thirst and crops ruined.
