

Topic:

All men have crimes, and most of them are hidden.

1. Introduction.

Thesis statement: Human beings are famous for their nature; some react directly through the greedy nature, but others show themselves through indirect nature in the negative behaviour; therefore, all men are known as irresponsible entity in the world.

2. Men and crimes - most of them are unclear: A brief overview.

3. Human beings, reacting like the irresponsible entity in the world through the crimes nature: Direct manner

(a.i) possessing greedy nature

(3.2) Disregarding growth of human development-

(3.3) Denying natural blessings

(3.5) Challenging status quo power in the world
e.g. The USA-China Cold war

(3.6) Adopting the deviate behaviour

(3.7) Being called: A man is a social animal

(3.8) Pursuing the steps, against the divine code of God.

(3.9) Enjoying the chaos and clash in society

(4) Some of the men-pursuing their manner through indirect way

(4.1) Pretending the well-wisher
of human development.

(4.2) Prioritizing the personal
interests - in a society

(4.3) Adopting the unethical
and immoral behaviour
on the agenda of human
rights.

(4.4) Denying climate change
and natural disasters
on the name of human
errors.

(4.5) Manipulating Justice and
peaceful delivery on
the name of the biased
nature.

5. Human beings - making
things in sight of world-
the balanced contribution.

(5.1) Believing on the natural
process of the world

(5.2) choosing the justified
means

6. Conclusion:

" All human beings are greedy by their nature; some of them pursue their objective through the proper and direct strategy; others opt their goals by obtaining the concealed method; however, they do not prove in the sight of world, as the criminal and irresponsible entity on the global accountability; they get pleasures, pursuing the ^{actual} ~~exact~~ behaviour of their suitable nature."

Sigmund Freud - The famous psychologist - Having observed the said words, that is left no doubt; human beings are irresponsible by their nature and behaviour.

Some of them pursue to ~~the~~ possess greedy nature while reacting the world affairs; they disregard growth of human development and also deny natural blessings as well as they also challenge status quo power on global arena. To add to that, they exploit

the deviate behaviour to deal with someone or task, and they are called - a man is a social animal that needs interaction of society, as he can move through ~~the~~ his own choice and accord. They pursue anything against the divine code of God in a society and global sphere respectively. Along with it, most of people also adopt their behaviour, reacting in a society through the hidden way, as they pretend the well-wishers of human development and growth in a society and also give priority their personal interest on the name of the public interest. They also deny the climate change and natural catastrophe, due to irresponsible act of human being. Subsequently, all men try to maintain balance in their nature, keeping the natural priority.

To start with, undoubtedly, all men have crimes, and most of them are hidden. The line proves it that men are irresponsible and unethical by their nature. Some of them react indirectly and others do it by indirect tactics.

According to Jeremy Bentham, all human beings are known by their free will nature; they react in accordance with the calculus benefits; but they adopt their ways differently. The fact is undeniable and can not be disagreed. anyhow. All men have crimes, and some of them are hidden, pursuing their actual means.

Men possess greedy nature in their active way of surviving. It is not concealed that men mostly prefer the greedy nature in the world. This is only the greedy nature

that holds the men responsible for their actions. "Human beings, especially men, are playing the pivotal role in the global politics that they grasp their power by manipulating global order, such as president of the USA, Joe Biden and Putin - the President of Russia as well as president of China." John Meaburnear. They always pry their individuality in regards to obtain whatever they want to grasp it.

Men disregard the development and growth of human beings that endure the world. It is obvious that the man always discourages other's human progress because they maneuver stuff with their nature. Again, the best example of the history which always repeats itself in the global time. Keeping their personal objectives

and interests, men always disarray the growth of human, as the rise of nationalism and religious ideological policy of Narendra Modi that always set up his agenda, to being dominate - personality in India. This is the man who ~~al~~ ever disregards the growth of muslims in India as well as across the world.

Another, the ~~reason~~ ^{factor} is that men deny the natural blessings due to their poor tendency of men, ~~the~~ ^{to} natural blessings, men have crimes and most of them are hidden. They deny to follow the natural blessings. Human beings are deplete with the natural blessings such mental ability, health, natural resources, human creativity, friendly atmosphere, minerals, sustainable natural laws, and

religious teachings and so forth. All the blessings have been established for the human beings, but they deny it and go against them, committing sins and violating natural phenomena.

Men adopt the deviate behaviour. Behaviour is the only quality that identifies the man, as the bad or good nature. Unfortunately, they opt the unethical and deviate behaviour. This deviate behaviour ~~etc~~ damages the values, ethics, rules and customs of society. For instance, the most prominent author, Robert Merton, he says "Deviate behaviour is the only attraction of the man who is not willing to opt the standard of society and global order; therefore, they reject them, and make their own order that shape their deviate behaviour. ~~so~~ Therefore, they have the,

Crimes in a shape of the deviate behaviour.

Moreover, they also challenge the status quo power in the world. This is the front nature of the man who does not concede the rule of any other over his boundary. Similarly, the ongoing war between China and the USA; both presidents are constantly challenging each other; China has a wish to breakdown the rule-based order of the ~~the~~ USA; but the USA plays its high potential policy to contain China, for procuring the global hegemony. Not only policy makers back the presidents' policy, but public also advocate to respective presidents. Hence, status quo is unacceptable for both sides.

Man is a social animal; that is an identification.

This line said by Aristotle gives the meaningful sense in perceiving the nature, Man is the social animal - is the said words that help in an understanding of human greedy nature and its social contraction with other people. "Man can not survive his life without having the robust interactions with society; unfortunately where he learns only those behaviours and actions that attract him personally" - Aristotle. This is the bitter reality of the man.

Man pursue the illogical steps that exist against the divine code of God. Man, completely inclines to obtain the religious sense of peaceful standards. However, most of man ~~go~~ ^{go} against the divine rule of God that delivered in the world for ~~surviving~~ ^{surviving}.

their lives in accordance with the set of rules. In this current era, men left following the practical guideline of the universal code, rule, law and set of regulations. As Allama Muhammad Iqbal wrote in his book, Reconstruction of religious thoughts, in which he said "Without observing the universal and divine codes and law, the direction of man is like an animal which attacks anything that exists in the world. So, ~~the~~ divine code that shows the pragmatic rules for pursuing the motive of life. So, the point, man left the motive to know the meaningful sense of divine code of God.

The men opt the nature that is suitable for the chaos and clash in society. It will not be wrong to state that man can not be

Satisfied until society suffers from clash and chaos.

Unfortunately, men love to be be conflictual rather than peaceful that is the level of human nature. Emile Durkheim pointed out that man always prefers to enjoy the conflict way and clash, as the famous dictators - Hitler and Mussolini that had left no stone unturned, engaging in wars and chaos. This level of nature is an evidence that men love being the suitable entity for conflict.

On other side, the men pretend to be well-wisher for human development. This kind of men that lead their interest in the soft way as if they are working for the sake of human development. In fact, they do not support the human

development and progress.
Such men are hidden.
For instance, many organizations
are engaging with human
beings with name of human
development and growth, but
in the true sense, they prioritize
their agenda, such as G7, G77,
UNO and its agencies. All these
institutions are achieving their
interests by any means. Hence,
the strategies pursued by the
men are effectively working.

The most hidden man
prioritizes their personal interests
on the same agendas. In
a society, this is the most
familiar purpose that is acquired
by these people who are keen
to their personal interests.
~~Similarly~~, ^{Similarly} the capitalists pretend
that capitalism and its priority
of free market is the valid
source to enhance capability
of people as well as State. For

technically, it goes in favour of major and elite class.

As west is doing on the name of human progress, but they keep their interest- at the zenith. This personal interest suits only those people who pursue the personal interest on the name of people-serving.

Another the dramatic strategy of the men is to adopt the unethical and immoral behaviour on the name of human rights. Although it can not be turned down, the human rights are not violated.

But in this ongoing scenario, most of people use the slogan of human rights, proceeding their task and motives through spreading the unethical and immoral behaviour. According to Jefferson Sachs, the American think tank "he demonstrated that most of people set up their agendas

and fit all these ones in society on the name of human rights violation which trigger ~~that~~ the society towards the immoral behaviour. Such policies and standards advocate the immoral actions in a society.

They also deny the climate change and natural disaster on the name of human errors. Not ~~only~~ a single person denies the climate change and flood that happen because of human errors. However, most of man get all the ~~disast~~ disasters misunderstood and not to be considered the mistakes of human errors and they are responsible for those fluctuations in the world due to the numbers of industries; Along with it, the USA President, Donald Trump said "I do not consider climate change the fact which

exists in the world, such statements prove that most of them ^{are} hidden in the world.

Most of the hidden ^{its} men manipulate justice and peaceful delivery on the name of the biased nature. Justice and its peaceful delivery is very important for sustaining the belief of people on the state and ^{its} relevant components. Unfortunately, "In the global arena, people manipulate justice for their gain; if justice comes into their favour, that is the meaningful ~~justif~~ justice. If it does not give favour to them, they start manipulating the justice and its meaningful delivery" Ban ki Mon. The biased nature of the people pursues ~~their~~ its objective.

For making this world in the equal ~~stakeholder~~ egalized pattern,

humans have to believe
on the nature process of
the world, In 21st century,
the global sphere has been
changed due to highly frequent
usage of the technological.

"Follow the accepted standard
of the society, world and
the rule of international
laws, as peace and ~~peace~~
prosperity is followed by all
the men" Kofi Annan This behaviour
supports the balanced contribution.

All men choose the justified
means. Means that are
acceptable, those are justified
by the full consensus. If
anything goes against the
justified, its repercussions would
be unbelievable in a society.

John Locke said in his
piece of paper, means are
only the perfect rule of the
documents that are made
with the collective ~~of~~ opinions

valuable suggestions that put
its positive feedback in this
world. Therefore, means are
justified that play the
pivotal role.

~~In~~ In conclusion, all
men have crimes and
most of them hidden. This
line is fraught with the
meaningful sense that demonstrates
the nature of human and
their actions. Furthermore, they
act in the distinct manner
and ways; some of them take
things directly, and others
pursue their objective indirectly.
All men have crimes and
their objectives and gains are
alike. They possess the greedy
nature, disregard growth of
human development and are denying
the natural blessings - on other
side, some of them are hidden
to follow their path, adhering
in the distinct ways on

the name of human
interest and human rights.
Additionally, they manipulate
so many stages for their
interest and purpose, therefore,
the contribution in the balanced
way brings the human
nature in the equal journey.
"World is reliant on the human
beings; they depend it world,
but different approach is
that men have crimes and
world has ^{its} the means" — John
F. Kennedy.
