

Artificial Intelligence: Its Merits and Demerits

Outline

1) Introduction:

- a) Is Artificial Intelligence (AI) a delusion or a necessity for human life?
- b) How has AI modernized today's world?
- c) Do humans need to be afraid of the rapidly developing AI-based machines?

2) What is meant by Artificial Intelligence?

- Artificial Intelligence is the ability of a system to think, learn, and perform tasks.

3) Merits of Artificial Intelligence:

- i) Upgrading the field of medicine.
- ii) Increase labour productivity.
- iii) Increasing national security.
eg Ukraine - Russia War
- iv) Reducing the impacts of climate change.
- v) Increasing the yield of agriculture products

4) Demerits of Artificial Intelligence:

- i) Invading human privacy.
- ii) Leading to unemployment
- iii) Accelerating hacking and terrorism

- iv) Changing the perspective of decision making through automated advisors.
- v) Overpowering human beings

5) Conclusion:
