— (1) —

When first flower of Spring season blossoms, it gives us a signal of pleasant days that are coming ahead of us. It gives us a sense that we have sustained through the harsh winter season and its time to enjoy each day to fullest because spring season is approaching.

— (2) —

According to the writer, humans as well as animals can make the best of the spring season, because

in winter everything of beauty is usually covered with snow and seems dead. So, spring season does not only rejuvenate everything but also brings colors to it.

— (3) —

Throughout the winter season, most of the reptiles goes into hibernation mood, for example, lizards. But as soon as they smell the odour of budding flower, they become happy to be alive once again. It is spring season when food grows in abundance and weather suits their habitat. Therefore, they are happy at the coming of spring season.
