Laziness : A Good Hobby

The author states that those people who do not know what and when they should do something, are responsible for all the evil in the world. Even in devil's kingdom, everyone is supposed to remain busy. He thinks that laziness, atleast, is not the reason for disorder in the world. The world is not short of virtues but those with kindness and lazy thoughts. Most of the energy in the world is misleaded. He gives an example of World War I that only if every influential person had gone on a holiday, every thing should have been better. These people, instead of going to Versailles, should have taken some days off, away from their busy schedule, then they could have gone to their real peace conference. Still they would have come back to see the world better.

Even now, the world can become better if the politicians give up the notion of laziness being a crime. Still now the religious sects rather discuss small problems than find solutions of big ones. They all should just take a little rest and focus on their mental health.
