

15.  
Education: Preliminary for survival.

Marks will be granted in your next assignment

History teaches us that no other resource can uplift a nation's ~~development~~ an effectively on the pursuit of knowledge. Nations who recognised the importance of education ~~that~~ never ~~had~~ compromised while inventing their resources to empower their masses, for them, education is a matter of life and death. ~~my~~ ~~the~~ the human revolution began with the word "Iara", meaning to read, emphasises its importance but the prophets, philosophers, and great scholars also advocated and stressed

ON

the role of education on path to wisdom and national progress. In today's world, nations which excel in education lead the world. For example Norway which allocates the highest percent of its GDP to education which is 6.5% followed by Chile 6.4, Israel 6.3 and Australia 5.9%, meanwhile Pakistan which not only lags behind in institutional capacity building but also it shares only 2% of its GDP which is falling short of sustainable developmental goals. Recently global rankings show the gap in living standard, political stability and educational quality, Pakistan ranks low due to its low literacy rate, depicting that ~~education~~ ~~education~~ how much important the essence of education is to lead at global forefronts. Therefore education is like an oxygen for the nation and without it ~~to~~ survived is a distant dream.
