| | There are various |
| | problems which answers a give |
| | the answer of a question that |
| | How women are remain in the |

oring side of profession? There are various kinds of reason. The first one is that the descrimination of wages on the hasis gonder at work place women both are auman beings task. They give the same time. Infortunately the men recieve more salery than women The industries gives allowances to the men rather than waren. hey recieve very little amount of adopunces. According to the the explotation of women's mal Women are always explicted at every sphere of life. Whether at domestic or professional. (Sylvia plath; However Women does not move upwated

basis of their gender. Women's do not remain (in) the Josing in professional life in the wages but they also remain losing side on edso remain dosing the basis of quoto quota: Women have very little or having the absonce of quota in vortous fields. Women are the population of the almost half of the world but the requirement 07 quota is very law which becomes the main cause of Women's lower status in the professional life. They do not have proper opportunity for for getting the good then they remain in the confiness of the availability of jobs. The low job quota in various countries for women is one of the major reason for the lowering the status of women in every feelds (Thon Churchell Hence The provision of low job quota is one of the major rea

reason for having lower stedos. In professional life Although Women does not only remain in the losing side en the term of job quota and wages but they also do not have proper security. Women do not feel secure because of not having protection. Workplace harrossment becomes the one of the main reason for women's losing side in professional life. When women do not feel secure then they do not work properly. They always try to confine herself within certain specific areasons According Human Right Commission Report 2020 there are 20,000 cases about Women's Workpolace harrassment in Pakitan. The women do not move upward When they do not feel properly p sate. So, Workplace herrasment is one of the meyor reason evident about women's Jain side in professional life. Work place harranent, gender-wage's and low job quota are those issues which are highlighted that women taking participation. While on the other hand. Women's underrepresentatives role is one of the main reason for not moving upword in professional life. They work propenly but their role is based on the representation of another malex pidentification. She does not perform actively. in various tields. Having certain issues like workplace herrasment women always try to remain Subjugate themselves. They do a dot of work but their role remains under the representation of a boss. Therefore. Women dow not work properly and if they I work properly then their role remain underthe representation of a boss of this way she looses

her Identity: So, under representative is one of the major evident of the Women's closing side in professional Although underrepresent alive role is one aspect which shows the subjergation of women. While on the other hand the glassi cieling in one of the major barrier in rising the status of women in professional life. The women connot do all kinds of jobs. There are certain only specified for men. They cannot show their abilities in such a kind of professional areas. As "Glass cieling acts like a border which does not allow women to apward" (Andrine Rich. Women's Status in Society. 1969) Hence glass cieling is one of the major example of women's don subjugation in professional life. It is tock that women are always remained a third persons in all fields of life. Whereas, there are various

and representative role in protessional life. Women are now becoming representative of those fields which dod not allow to hold representation. They are now handling various matters at administrative levels. As; women are now becoming the justice. and Lieutenant Greneral etc. Justice Musarat Hilali, Justice of Labore High Court Needom Honir, and add.
in the field of army Lieulenand
General Nigar Johan are the women who are handling administrative level and show their proper representation. So, now women do not remain in the flour walls of house. So, the concept of underrepresentative role has det does not remain longer. Abolition of Gender wage gap and the representative role of Women are the good intratives but the another most crucial aspect of the government's initiative is that they increase the job goda

of the government's initiatives For the protection of at workplace.
Women could not work properly
because of the harrasment. The safedy of the women at workplace shows that the Women are now becomes the priority of the professional administration. The initiatives about workplace harrasment shows that the status of Women is vising in every field. The industrialists a are now considered that women are as important as men for running a firm (John Linkin. The new eva And the Women So, I women are now considered as the priority of firms.dn this way the fear about workplace harrassment has gone. Glass cieling concept had become one of the major issues for women. They do not enter in the various kinds Fields. like politics, games, and detence's areas etc. This

problem has shon with the help of certain inclindives. The women's inclusion in various kinds of field help them in elevating their status. They are now becomperformed that dutées as a poblimentarians. pilots police officer etc. Inclusion of women in all fields is like a good Omen for them which will bring lifting ress and prosperity in their and country" ("John Adam. Tolass Cieding: Women'). In this way women can elevate their status in both professional and social life. It is to be considered that various kinds of initiatives healps in elevating the status of women. There are various kinds problems which one still exists in society despite of lagislation in society: There are certoun issues like gender gap is still remain high in the society at private sector. Pakistan has adopted a capitalist

sydem of economy. There are or great number of private codors. that the g The greator number of population the women in is workering in private sectors. The various kinds accomment imposes its policies on provides them government sector Gen Wages desormination is based on gender is still remain a kind of inclusion of in the quote solution of great problems. The private sectors are recieving the same result Women are and outcomes from both gender the half o of the we They do the same work and same duration but they owner country. They utilization treats the labour with descrimination on the basis of their gender. amount of Wage descrimination is the great a pinch of to World B Issue of the private sectors' labour quota does force As " Wagest descrimination on the basis of gender rather on the ments of p little amo abilities of the person is one facilitate. of the major explication of Women's right. (Khalida Naseem. provision of Explication of Women Right. 21 Aug. 2024")". Hence the gender lower in wages' descricimination is still does not exists in our society.

It is argued that the government includes the women in the labour or various kinds of fields and provides them quota but the inclusion of lower increament in the quota is not the solution of the problem. As women are now becoming the half of the population of the world and also our countay. They do not get utilization from their dittle amount of quotoralt is like to World Bank report the quota does not fulfill the requirements of Pakistani Women-Only little amount of Women can facilitate from the available provision of quoto. Therefore wit lower increament of quota in the various kinds of field does not resolve their issues.

governments of the world makes various ilous for the protection of women but they do not implement properly. When the implement-ation of law does not implement properly then we cannot resolve the existing issues. Women are still becoming the victims of harrasment at workplace. They do not do work properly without the fear of harrassment. As the murder of Indian doctor on 8th August is the solid fact of improper implementation of laws. As Pakiston also has 2200 harrassment cases at workplace (WB report). 17 the then how the individual property can feel protect in society.
While On the other hand the representative role of women in society can

6

can be observed Unfortunatedof. various kinds of Fields which do not provide proper representation. in Women are still facing subjugation. There are a number of women which perform their abilities under the representation of male. It is also reported that women are showing their abilities at a smaller number. World Bank has reported that there are very little represe-nutation of women at various sectors. Pakistan should improve its sthe inclusion of women at various sectors. So, the little representation of women out few sectors of employment does not mean that women are performing their representative role. It is considered that women are performing various kinds of jobs and the concept of glass cicling is no more.

It is also like a kind of a dittle amount in a thing. It is the fact that that the government takes initializes for performing in their role in various fields. There are various kinds of fields which do not allow the large number of women. As the Parliment only demands the 33 pc of women's representation When the women represents: bill about women's right it may not passes because of having the little amount of representation. This creates a kind of barier for women for fulfilling their demands In this way, can be observed in various kinds of Fields To be curt, the Women's stockus at professional field is not obvious the Women always remoun under the subjugaction of mode

policiarchal society. It + They are also explicted at the workplace through various kinds of aspects like the specification of jobs. Now job guota and workplace harrassment in This way women connot perform her duties properly. As Although 1 government tooks proper initiatives for the improvement of the status of women professional life. They make ilegislation at the issue of wages, protection and providon of quota. on ge Atthough these efforts proves helpful in raising the status of women Although women are not facing the problems of like 19th century's women Ket there are vertous kinds of problems which are still existing in society. The efforts of government are good but these are Jooks like the form of little 'drops.

of water from a ocean. and the problems of women are wife an exercise in our society. The women do not feel properly protects they recieve down wages, glass cirling and issue of under representation are still existing in professional side. It is no doubt to say that the society does not provide proper platform for women. Therefore, they remain in the losing side in professional life.

To empower women is not the solution of descrimination ---To protect and raising the status of women are the solution of the gender descriminated.
