Date: H man was Crossing jungle in order to reach his destination. Guddenly, he saw a mighty lion, a venemous and a hungry tiger Kushing towards him. This feightened the man but he was completely unable to escape from the dangerous animals. Similarly the world is faving multilateral challenges and a deficit of solutions The multilateral challenges of the world are manifold. Some of them are climate change, conflict over natural resources, and Shift in global order. Additionally, increasing human rights violation and sising hatred among people one multilateral chall enger Furthermore, the threat of Artificial Enteringence and the problem of nuclear weapons are executing trouble across the world. Atthough, this Pletura of multirectual challenges

MINISTRA

is threatning the existence of rumanity in the world, the world Still lacks proper solutions. There is no viable solution for combaling Climate change and controlling the depletion of natural resources. Simelarly, the world has no solution for maintaining global orders restricting human rights violations, and eradicating natured. The obserts of socutions against Artificial intelligence and nuclear weapons highlights the inability of the world to overcome prevailing challenges. Therefore, the world 13 facing a pletura of problems multilateral challenges but lactes proper solutions for overcoming them.
