

Artificial Intelligence will overtake Humans

outline

A. Introduction:

B. Artificial Intelligence will overtake humans

a. AI can analyse vast amounts of data beyond human capabilities.

b. Artificial intelligence in Education

c. AI can understand human languages

d. AI can create content

e. Artificial intelligence in Agriculture

f. Artificial intelligence in transportation

g. Artificial intelligence in digital marketing strategies

h. Artificial intelligence in risk management of finance

i. Artificial intelligence and Health

j. Artificial intelligence For entertainment.

k. searching techniques in AI.

l. Artificial intelligence in Disaster management.

m. AI in Robots

c. why AI may not fully overtake humans

i. AI will not overtake in emotional intelligence

ii. In the expression

iii. In the family relationships

iv. In managing unpredictability

v. In complex social interactions.

D. Conclusion

In 1956, the term "artificial intelligence" was coined at the Dartmouth conference, organized by John McCarthy and his companions. So, this event is considered the official birth of AI.

Today, AI is the heart of technology innovation.

Artificial intelligence (AI) is a branch of computer science, focused on creating machines and software that can perform tasks typically requiring human intelligence. These tasks can include learning from data, recognizing patterns and even exhibiting creativity. AI aims to build systems that can adapt and

improve their performance over time without human intervention. Areas where Artificial intelligence will overtake humans. To clarify this in comparison to humans AI can analyse vast amount of data. Besides this Artificial intelligence can translate and understand human languages. The increasing use of Artificial intelligence in the transportation. More the growth of Artificial intelligence in digital marketing. Similarly, areas where AI may not fully overtake the humans. Such as in the emotional relation artificial intelligence will not overtake the humans. In the family relations where artificial intelligence will never overtake the humans. Although, there are many zones where artificial intelligence will overtake humans such as Agriculture transportation, Health, entertainment and digital marketing strategies. In contrast AI never beat the humans in the emotions, expressions and managing unpredictability.

Day: _____

Firstly, the artificial intelligence will overtake the humans in the field of education.

Artificial intelligence in education refers to the application of AI technologies to enhance teaching and administrative processes in educational settings.

The solution of every problem become easy by the use of AI. AI provides guidance to students and also help in grading, evaluation of saving teacher time. The most widely

used chatbot "ChatGPT" had 1 million users within five days of being its release. Thus,

the artificial intelligence surpasses the human intelligence in the field of education.
