

Labor Saving Devices are more troublesome than they are worth.

1) Introduction

2) Decoding the term "Labor Saving Devices"

3) Why labor saving devices are more troublesome than they are worth? (Thesis)

(i) Increase complexity and maintenance cost

(ii) Consume electricity and add to the electricity bills.

(iii) Cause environmental pollution

(iv) Give rise to "consumerism" and "throw away" culture

(v) Malfunctioning can threaten one's life.

(vi) make humans indolent by over reliance on them

(vii) Disruption of social interactions that accompany manual tasks

4) Why labor saving devices are more worthy than troublesome? (Antithesis)

Write some paragraphs for proper evaluation

- (i) Save time for leisure activities
- (ii) Free humans from the physical exhaustion of manual work.
- (iii) Increase economic productivity and cost effectiveness.
- (iv) Enhance safety and precision.

5) Undisputably labor saving devices are more troublesome than they are worth.

- (i) Labor saving devices reduce physical activity which is a source of exercise.
- (ii) Increase economic productivity but exacerbate environmental harm.
- (iii) Enhance precision but increase cost.

6- Conclusion:
