US unconditional support for Israel

The United States has history of promoting human rights globally but its stance on Palestinian conflict has been notably one-sided. US consistently backed Israel in its harsh actions towards Palestinians. U.S. supported Israel by justifying its henious actiocity towards Palestinians as its defense against military groups. U.S has deployed its military ships and fighter jets in the Middle East to protect Israel from potential threats by Iran and its allies proxies in the region. In this way, US backed Israel and has shown disregard for human rights voilation allowing Israel to carry out severe actions with little accountability.
