KNOWLEDGE IS POWER

According to E.F. Schumacher, a gift of knowledge is ~~more~~ preferable than gift of material things. By giving a gift of knowledge to anyone, indeed you are going to stand him on his own feet. While by giving a gift of material things, you indeed make him dependent. As saying goes; give a man a fish, you are making him dependent while teach him a act of fishing, he can help him all his life. That is why aid programmes is less resistent than intellectual gifts. Former makes man dependent while later makes ~~man~~ independent. ~~Offenly~~, a gift of material goods. leads to development of what???

rephrase these lines

EDUCATION and Its Role in Demography

According to Drane Ranich, Education doesnot develop in isolation - it prevails in society by change in demography, technology and the family.

The main of education is to learn basic skills to run the day to day affairs of the life.

According to Horac Mann, intelligence is the primary ingredient in the wealth of nations.

Education always brings demographic change. It tends to move from poor nations to rich nations. It upto host country that either it adopts the immigrants culture in their own society or push them back. In effect, the state schools may encourage trends that raise doubt about the purpose or necessity of state system of education.

AN INSECT'S LIFE

There are different human reactions towards different insects. As reaction towards cockroach is disgust while butterfly or dragonfly is admiration. In the past, the insects wipe out entire tribes or nations and fields. There are many advantages of insects like bees which was the only source of sweetening in the past. Ants that contaminate the human food but also eat those pollutants which pollute the environment. According to entomologists, insect fossils inhabitate for nearly 400 million years live in every corner of the earth. Some insects behave like human discipline. By founding its desire things they inform fellow insects by some posturing and gesture. They act totally in totalitarian manner.
