

The complex existence of human in this immense universe created in them to know the mysteries of life. They look forward to communicating with some supreme power to know about their future. Palmistry and interpretation of dreams have been popular ways for foretelling the future. In ancient Greece fortune tellers predicted the future happenings by decoding the signs and signals to determine the wishes of gods. Sometimes gods spoke directly to the chosen prophets who received message from gods in a state of ecstasy. Similarly, Greek consulted oracles to know about the decision made by deities.

Title :: Human desire to ~~the~~ know  
 Dr. S. N. Will

Nizar Hassan, after graduation, he started his career in Cinema. In 1999, he produced "Independence" in which he exposed the fake Israelis' Fake concept of Independence, when they captured palestinian land. Later, when Israelis tried to annex more palestinian lands. Nizar produced another film "My Grand Father's Path". The film had a message that if palestinians would focus <sup>too much</sup> on their enemy, they would become like them. If they kept on condemning the atrocities and injustices of the Zionists on daily basis, one day they will be like them and will forget their own beautiful ideals and aspirations. This is a trap that palestinian should avoid and should rather focus on their own art and literature. Nizar believed. This is long which requires patience to watch. Aljazeera
