

Education Crisis in Balochistan

Over 3500 schools in Balochistan are currently non-functional and it needs 16000 teachers but unfortunately the new government when came into power in February 2024, more 542 educational institutes have closed down.

Education is the fundamental right of the nation and it is obligatory on government to give the quality education to the youth of the nation.

Education built the future of the country and socio-economic. Uneducated society exacerbates the cycle of poverty and conflicts. Government need to reverse this trend and take action to functionalize the schools and provide good quality teachers.
