### Introductory Paragraph:

The brain drain is a warning sign that a country is not providing the citizens with the opportunities they deserve, and that it is not harnessing its human capital to ~~the~~ its human capital to drive innovation and growth.

Many countries are losing their best and brightest minds as highly educated and skilled individuals move abroad. This phenomenon, known as brain drain, has a serious consequences that go beyond just economic losses. It can effect a country's

ability to innovate, adapt <sup>to</sup> change and solve problems.  
Unfortunately Pakistan is one of them the main causes  
behind brain drain are limited job opportunity,  
lack of freedom and human rights, instability and  
corruption, poor living conditions and limited  
access to education and health care.
