

Topic:

Expanding Information Technology: a curse or blessing

Brain storm

Curse

- made people ineffective
- + ~~interpersonal~~
- Health issues
- environmental concerns

Blessing

- world has become a global village
- easier working
- larger storage
- enhanced quality of life.

Outline:

1) Introduction

(a) Hook

(b) General statement

(c) Thesis statement

2) Aspects where Information Technology is a curse (Anti-Thesis)

- (a) Increase in ineffectiveness of people: Human body has become dependent on technology - critical thinking is reduced.

(b) Health issues: neural complexes -
sight issues - physical inactivity -
documentary analysis

(c) Environmental concerns: pollution -
depletion of natural resources.

3) Rebuttal to the aspects where
Information Technology is considered
a curse (Thesis)

(a) The world has become a
global village: increased communication
while on distance - larger exchange
of information

(b) Working has become easier: less
critical thinking is required - lesser
physical power is needed because
of machines

(c) larger storage is beneficial:
data is stored without trouble -
rise in productivity

(d) Enhanced quality of life:
Pharmacology - household devices -
enhanced infrastructure

4) Conclusion
