

Noa (June Mock) 2024.

Translation.

When Titanic had ~~had~~ ~~drown~~, an American billionaire, John Jacob Astor IV was on board. He had enough bank account to construct 30 titanics. Therefore, facing the life threatening danger, he had chosen for what was ~~the~~ morally the best, and he had left his place on life boat for saving the lives of two frightened kids. The biggest partner or share holder of the Chinese American Departmental store, Esdore Estais, "Merris", who was ~~on~~ aboard on Titanic has said, "I would never get on the boat before the other men". His wife, Eda Estais, also had decided to get on the life boat, and gave her space to her maid, Allan Bert. She had decided to spend her last moments with her husband. These richest people individuals, have not compromised their principles of morality over their wealth or even for ~~their~~ giving up their lives. Their choice in favor of moral authority highlights the dignity of human civilization and human nature.

Noa Mock (June-2024) Mock 2.

A person played a music with a violin for 45 minutes in the New York city's sub-way. Majority of people were there. One couple clapped for him. and he ^{had} collected approximately 30 dollars. Nobody knew that the man who played the violin was Joshua Bail. He was one of the best musician of the world. Joshua played one of

the rare music he had written with him by the violent worth 3.5 million dollars. Two days before this subway performance, Joshua performed at Boston and earned millions of dollars. Through Experience, it is evident than an ordinary thing in an ordinary environment does not shine. And mostly, it is neglected or given less importance. At every place, there is an availability of talented people whom are not getting that recognition or reward for which they are ~~elig~~ eligible. That is why where you get honour and value, there you should go.

Noa-Mock 2023 (Nov).

In Pakistan, crores of young people belong to generation-Z. The birth of this generation came after the year of 2000 and today, its age has reached to 23 or 24 years. This generation is considered ~~in the entire human history~~ as the most physical weak, a load/burden, and a mentally unstable. In the entire human history. The era in which it is born, is been considered as the most used technological era. This generation is brought up by using the technology. In its abandonment, there are internet, T.V. ^{channel}, mobile phone, tablet, and social media. This generation is nurtured by the social media, and not by the elders. This generation has only one issue in the entire world. They have less toleration and more aggression. Their physical health ~~is~~

very weak. And, in the human history, it is taking a lot of time to stand upon their feet or to become independent.
