

# Burgeoning Gaza War

Since its eruption in Gaza, the genocidal war has been gaining great pace and aims at engulfing the whole Arabian Peninsula. After the pager attacks, Israel has fired numerous deadly missiles on Lebanon on the account of self-defense and wiping out Hizbullah — an Iranian-sponsored militant group. More than 500 innocents have died in brutal attacks and thousands are injured. The Defense Ministry of Israel has warned of ground operation ~~if~~ if Hizbullah further retaliates. It has been a year since the people of the Middle East and Palestine are bearing the brunt of deadly missiles and biological weapons. The region is at risk of burgeoning war as multiple militant organizations are operating against Israel. Pakistan has vehemently ~~very~~ rejected the Israeli claim of self-defense and demanded urgent intervention of the global leaders.

Speaking to the 79<sup>th</sup> UNGA, Khatami demanded the urgent ceasefire and warned Israel of avoid it ulterior motive. Iranian President Masoud Pezeshkian

spoke to UNGA and stressed the need of lasting and sustainable peace in the region. He added that war was not solution of any dispute

either it would deteriorate the

global politico-economic regime and harm the security dynamics. The

increasing security dilemma across the region depicts the

failure of international law, UNSC, and the major powers. The USA

has given carte blanche to

Israel to wipe out Muslim community from the holy land of Palestine.

The ICJ has warned Israel of stopping genocidal campaign in the region.

The claim of self-defense seems quite fraudulent as different multinational bodies have compared it to

an ethnic cleansing.
