

Name:

Letter

Write a letter to the editor of a newspaper highlighting the role of electronic media in creating awareness about the moral and social values in our society.

Examination Hall,

City: A.B.C

9th September, 2024

Subject: Highlighting the role of electronic media in creating awareness about the moral and social values in our society.

Sir,

I am writing this letter to draw your attention towards the role of electronic media in creating awareness about the moral and social values in our society. Media plays an important role in our lives. Even it will not be bad to say that electronic media is shaping our lives. As electronic media

has significant place in society and our lives, moral and social values are also very important. Due to modern technology, internet and busy routine of life, we have forgotten moral and social value. Internet has connected people in the worldwide but isolated them even they are sitting in one room or living in a home. Parents seem to be failed in moral upbringing of their children.

Electronic media can also be used for various purposes other than communication. That's why I am requesting you that electronic media should be used for awareness of moral and social values. I can surely say that if electronic media is to be used for these purposes, moral and social values will be revived once again. I hope you will take steps in this regard after receiving my letter.

Yours Sincerely,

X.Y.Z
