Consider a country where every person is enjoying the status of developed country ^{or nation}, it would not be less than a heaven in world for them. Prosperity is ~~the~~ ^{defined} as progress and development of a country in every field of life, whether it is field of agriculture, technology, science and many others. In the case of Pakistan, there is desire need to adopt effective pathways to become a prosperous country. Pakistan can lead towards prosperity by implementing modern agricultural ^{practices} and technologies, prioritize human development to enhance productivity and competitiveness of Pakistan. Similarly, development in policy making and planning implementation can play effective role in industrial growth, stable governance and also in environmental factors. Likewise, promoting investment into research and development that can derive innovation and advancement

in various sectors. such as Pakistan
can also lead towards prosperity by
establishing social safety, creating
opportunities for youth and addressing
political polarization for long
term economic stability and development.
Currently Pakistan is suffering from
down fall of economic situation that
can be combat by adopting various
pathways.
