

Paragraph Writing Practice

Causes of WOI

(i) Religious Cause:

When East India Company arrived at India, then their purpose was not only to trade in India but ^{was} also the propagation of Christianity.

They wanted to spread their religion at any cost and for that purpose, they put a lot of efforts. One of their famous priest Dr. Pfander ~~write~~ criticized Islam a lot in his book 'Mizan Ul Book' which made astonished to all muslims.

The other priest mentioned that if all India is under the same govt, then they must be under the same religion. Along with that, they forced ~~the~~ the orphans who were ^{living} in orphanages to proselytise ~~the~~ towards the Christianity. These all incidents were enough to open the eyes of Indian people to

See the propaganda openly.
Finally, ^{At the end,} it ^{also} paid a lot in
the uprising of WOT 1857.

Artificial Intelligence

In the world of technology, the roots of AI has grown everywhere. Almost the entire world is taking benefits and developing nations with the help of Artificial Intelligence. No doubt it is one of the great creations of man. It has made human's lives so easy by helping him at multiple levels like at professional, academic and personal level.

But as the rose has thorns, similarly AI has also multiple disadvantages. It has been observed that just because of this, people especially the students have lost their creativity

by using it madly in their academics which is quite destructive for their productivity. Humans have the ability to be productive and create much more things.

They should be more creative rather relying on AIs totally.

Man should not forget that AI is his creation, not he is the creation of AI. Everyone needs to understand one thing that excess of everything is bad. Taking everything into account, AI is a great creation but if it won't be used in limits, it would be proved as "humans' creativity has ruin his creativity".
