## A Need for Integrated Approach in Urbanization.

In this passage the writer explained that although the green spaces — parks and lawns — being limited in number amidst cities, serves multiple benefits to human beings, <sup>yet it</sup> needs an integrated approach in urban planning and environmental development.

These parks are used for sports, cultural events, and other recreational activities.

Besides, it also provide its services to improve air quality and alleviate the heat effects of concrete. It also provide a place for a person's mental health and introspection.

But the cities planning faces a challenge of creating a balance between environment and human development. According to the author, it is imperative to create and maintain development and environment through shared responsibilities with the vision to establish a harmonious co-existence of human and environment.

## How Education Impact Individual & Society

According to the author, three schools of thought exist on the basis of ~~the~~ psychological theories and the results of these theories. He further explained that there are those who completely agree to the freedom of children. In contrast, there exist a narrative who denies it. Moreover, a third view exist, in which people have the say ~~of~~ of freedom meanwhile they should always be good. ~~The~~ Despite logic the third one outnumbered the latter two. The writer argued, ~~the~~ the belief that liberty ensure moral perfection is an old one and does not <sup>to be</sup> applied on animals and children. He opposed those who who believe that education

is just a mean of personal development. According to him this is a pure individualistic mindset, while the society demands collectivism - co-operation from every person of the society. Can be brought through education - for living in a small area. He thinks that education will be more than just opportunities. Besides social growth it uplifts the moral and mental caliber of the individuals.
