ENGLISH PRECIS AND COMPOSITION

NOA Mock Paper
February 2024

Q: Translate the following into English by keeping in view any figurative/idiomatic expression (10 Marks)

Translation:

After 3 years, University degrees will become useless. Technology is advancing fast and people want quick answers. This makes our current knowledge and information sources obsolete. With all information available on our phones, facts are being replaced with opinions, and action is prioritized over thinking. The concern is that soon, false information will be used to manipulate public opinion and people constantly connected to technology will only be able to watch, without understanding the world's secrets.

THE END
