6) Conclusion:

Did you know 70% of Pakistan's work force operates outside the formal economy? because of being undocumented. Pakistan has a huge population due to that it severely need economic growth with in the country but million of workers and businesses operate outside of formal government regulation. from street vendors to small businesses. However the widespread economy bring complex consequences/ challenges, like, insufficient tax collection, Dependence on external bodies, money laundering and the causes are unemployment, regulatory barrier.

Addressing these issues is essential for Pakistan's economic growth. as transitioning informal economy to formal sector.
