

## Passage.

One of the fundamental facts about words is that the most useful ones in our language have many meanings. That is partly why they are so useful: they work overtime... Think of -all the various things we mean by the word "foot" on different occasions: one of the lower extremities of the human body, a measure of verse, the ground about a tree, twelve inches, - the floor in front of the stairs. The same is true of nearly every common noun or verb...considering the number of ways of taking a particular word, the task of speaking clearly and being understood would seem pretty hopeless if it were not for another very important fact about language. Though a word may have many senses, these senses can be controlled, up to a point, by the context in which the word is used. When we find the word in a particular verbal setting -we can usually decide quite definitely which of the many senses of the word is relevant. If a poet says his verse has feet, it doesn't occur to you that he could mean it's a yard long or is three legged (unless perhaps you are a critic planning to puncture the poet with a pun about his "lumping verse"). The context rules out these maverick senses quite decisively. //

## The Usage of words

~~Fundamentally,~~ words have many meanings. words are so useful which can ascribe various things on different occasions. A word consists numerous senses. The senses can be understood by the context of a word's usage. The poets also use words in poetry differently. Therefore, the words of the poets in poetry can be understood by the context.
