2.3.1. Increased cost for education
~~and~~ and training

2.3.2. Negative impact on research

2.3.3. Damage to education system

2.3.4. Reduced quality of education

DATE: _____

DAY: _____

2.4- Social Consequences

2.4.1- Family separation

2.4.2- Loss of Role Models

2.4.3- Cultural impact

2.4.4- Community disruption

3) Conclusion

3.1- Thesis restated

3.2- Conclusion Thoughts

THE ESSAY

Einstein, a renowned physicist and Nobel laureate, was a proud German citizen. However, with the rise of Nazism, Einstein faced growing hostility and threats. In 1933, after Hitler came into power, Einstein immigrated to America after renouncing his German citizenship. He said at that time; "As long as I have my choice in the matter where civil liberty, tolerance and equality of all citizens before the law are the rule." So Germany lost one of its most brilliant minds due to political instability, intolerance and persecution. Einstein's departure deprived Germany of his expertise, research and contributions to science, ultimately weakening the country's intellectual and scientific landscape. Brain drain is migration of skillful people out of a country. Most of countries are facing issues of brain drain. Unfortunately, Pakistan is one of them facing problems in brain drain due to political instability, educational decline, social disruption and lack of economic opportunities. It has drastic impacts on economic growth, politics, health care and education.
