Crimes

Conclusion

The Essay

"More than 1.5 million people have left the country and have migrated to different parts of world, including 92,000 of them experts in their fields from IT, health care, engineering, education and accountants" (Economic Survey report 2023-2024). Brain drain has become a deadly phenomenon for third world countries, specially for Pakistan, where 64% of people are trying their ways to get out from country, where 24% of them are on view of never coming back to their homeland. Almost 04 lac students get passout from different universities annually in Pakistan. Most of them get trap into the mud of employment, some of them compromise on low

Are in
struggle to

wages to sustain their life while rest of others migrate to different countries. So this is how the exploitation of energetic youth and brain drain causing continuous hopelessness in next generations. The factors that are rising this phenomenon in context of Pakistan are, Political unrest being faced by Pakistan since 1947 works as a fuel to this phenomenon, low opportunities for fresh graduates and layman to practice their knowledge and earn a handsome amount respectively, Rise in inflation has made difficult for the people to live their lives and run households by living in this country, low wages are being eaten by inflation and they have to move out to meet their needs, Further more the poor rule of law contributes to unequal systems for elite and poor is the major cause. To consider all these issues lead the country to lose experts in various fields which reflects in the form of poor management in different institutions, which causes the hopelessness among
