|       | Causing glaciers to melt and increase on |                      |
|       | sea levels which are threat to coastal   |                      |
|       | Therebye it is issues of migration.      |                      |
|       | Therefore it would not be wrong          |                      |
|       | to say that the rapid increase in        |                      |
|       | population growth has intensified        |                      |
|       | inversemental degradation by creating    |                      |
|       | resource depletion and pollution. As     |                      |
|       | a result to also has adverse affects     |                      |
|       | Otabaa H                                 |                      |
|       | Starting with impacts of population      |                      |
|       | is that it consider                      |                      |
|       | due to encrease in demand As much        |                      |
|       | population increase so is with demand    |                      |
|       | of resources. To manage such a big       |                      |
|       | population creates lack of resources     |                      |
|       | and only some part of the population     |                      |
|       | is able to get them and others remain    |                      |
|       | empty handed According to the report     |                      |
|       | of United Nation global human            |                      |
|       | Population has reached upto 8.1 Billion  |                      |
|       | people in 2023 and it was only           |                      |
|       | 2.5 Billion in 1950s, Population of      | 11<br>11<br>11<br>11 |
|       | world grew fastly in last two decades    |                      |

| Date: | .Day:                                                                         |                  |
|-------|-------------------------------------------------------------------------------|------------------|
|       | with the speed of explosion. Therefore it                                     |                  |
|       | is not possible at the moment to manage                                       |                  |
|       | resources and produce them as well with                                       |                  |
|       | the pace with which human population                                          |                  |
|       | is growing. Therefore, as much human                                          |                  |
| 70.7  | beings will grow in number it will keeps                                      | ((               |
|       | on creating scarcity of resources in The                                      |                  |
|       | world                                                                         |                  |
|       | In addition, increase in population                                           |                  |
|       | is creating more agricultural practices                                       |                  |
|       | to meet nutritional needs which is                                            |                  |
|       | creating soil depletion. In past there                                        |                  |
|       | were fewer people and agricultural                                            |                  |
|       | adivitées fewer limes in a year were                                          |                  |
|       | enough to meet the demands of people                                          |                  |
|       | but now population has been increased and even agriculturing in more land and |                  |

This           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| dependency of human beings on the           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Date:_ |                                               |     |
|--------|-----------------------------------------------|-----|
|        | fossil finds the state to be a second         |     |
|        | fossil fuels in their daily lives is creating |     |
|        | sise in the temperature of the world          |     |
|        | which eventually increases the climate        |     |
|        | change.                                       |     |
|        | Moreover, not only this human                 |     |
|        | beings are rapidly doing deforestation        |     |
| 74.4   | which is creating loss of biodiros by.        |     |
|        | There are multiple purposes for which         |     |
|        | human beings do deforestation one of          |     |
|        | them is to meat their energy needs            |     |
|        | by burning the wood, other one is             | III |
|        | thy making goods of their daily we            | (   |
|        | and deporestation is also done to             |     |
|        | make Jour housing Jourehas Deforestation      |     |
|        | will not affect badly if it is done           |     |
|        | in a limited mamner and by planting           |     |
|        | trees continuously But if this is not         |     |
|        | done deforestation can cause harmful          |     |
|        | affects on population as well be              |     |
|        | increasing the temperature and carbon         |     |
|        | level. Still there is increase in the         |     |
|        | level of deporestation with each passing      |     |
|        |                                               |     |
|        | year as the report of www Brazie              |     |
|        | Deforestation in the Amazon remains           |     |
|        | at high levels with a rate of 11,568 km       | ĮL. |

| Date: | Day:                                          | Ling              |
|-------|-----------------------------------------------|-------------------|
|       | in 2022. It creates loss of bio diversity and | 3.                |
|       | nature which becomes very difficult to        |                   |
|       | restore.                                      |                   |
|       | Additionally, increase in population          | h                 |
| - N   | is causing overcrowding in cities with        |                   |
|       | better facilities which ultimately creates    |                   |
|       |                                               | V                 |
|       | pollution Cities in which there are more      | ne god            |
|       | people become overcrowsed and people          | . 100 000         |
|       | live in dense areas. Increase in energy       |                   |
|       | consumption and traffic usage. More           |                   |
|       | population creates higher Concentration       | 1. 1              |

|       | according to Air Quality life Index           | -                 |
|       | report compiled by Uneversity of Chicago.     |                   |
|       | Moreover according to report people of        |                   |
|       | Delhi could have their lives shortened        |                   |
|       | by almost 12 years due to the poor            |                   |
|       | air they breath in All this pollulion         |                   |
|       | is mainly caused by the dense population      | 11                |
|       | of the copy                                   | . /-              |
|       | V                                             | ne or the fire    |

| Date:        | Day:                                       |     |
|--------------|--------------------------------------------|-----|
|              | Also, Inappropriate waste management       |     |
|              | practices becomes cause of land            |     |
|              | crossion and also of air pollution. There  |     |
|              | are many countries in which there is       |     |
|              | no proper mechanism of waste management    |     |
|              | but they produce huge amount of            |     |
|              | waste due to their large population        |     |
|              | which becomes problem for that country     |     |
|              | by ending their land and problem           |     |
|              | for other countries by turning into The    |     |
|              | air pollution eventually some of the       |     |
|              | wastes which are most hazardous to         |     |
|              | human and aquatic life which needs         |     |
|              | to be decomposed properly is plastic       |     |
|              | It is one of the most dangerous substance  |     |
|              | and according to the report of un          | 100 |
|              | environment program, By 2040, there        |     |
|              | will be 1.3 Billion tons of plastic        |     |
|              | waste present in the environment In Such   |     |
|              | Conditions not only human beings are at    |     |
|              | sisk but also the speares ling in          |     |
|              | water as well, therefore, waste management |     |
| Les ètes lug | is hazardow for land, are and              |     |
|              | water                                      |     |
|              |                                            |     |
|              | mond from I was                            | 3.3 |

|         | D                                                                             |     |
|---------|-------------------------------------------------------------------------------|-----|

|         | Due to all these achibies of                                                  |     |
|         | human beings and their unstoppable                                            |     |
|         | population Environment gets degraded                                          |     |
|         | but & Consequently environmental                                              |     |
|         | degradation also adversly impacts the                                         |     |
|         | human population in negative wy.                                              |     |
|         | firstly, Environmental pollution                                              |     |
|         | affects human health in a negalire                                            | 200 |
|         | way It creates many problems for                                              |     |
|         | people specially who has weak respirat                                        |     |
|         | on system our body needs clean air                                            |     |
|         | for proper respiratory functioning but<br>due to industrialization we are not |     |
|         | able to get clean air which is                                                |     |
|         | impacting our health. The world Health                                        |     |
|         | Organization estimates that air pollution                                     |     |
|         | kills 7 million people every year. It                                         |     |
|         | is because of that environment which                                          | 1   |
|         | it returns to them by such impacts                                            | 200 |
|         | on health.                                                                    |     |
|         | Secondly, Environmental Degradation                                           |     |
|         | Causes Natural Hazards which Creates                                          |     |
|         | alot of problems for human beings                                             |     |

| Date: | Day:                                       |  |
|-------|--------------------------------------------|--|
|       | in aspects of economic constraints as      |  |
|       | well as for governments to provide         |  |
|       | Gesvice delievery. It impacts more badly   |  |
|       | to the developing and weaker countries     |  |
|       | because they already lack sources to       |  |
|       | manage garcmance in normal times           |  |
|       | but Such dipsorten creates hurdles for     |  |
|       | their people even ten folds for example    |  |
|       | UNICEF declared 2022 floods in             |  |
|       | rakistan as one of the most devastating    |  |
|       | floods. It Submerged one that of the       |  |
|       | country, affecting 33 million people, half |  |
|       | of whom were children. Pakistan faced      |  |
|       | more difficulty in managing the situation  |  |
|       | because of lack of resources and           |  |
|       | huge population It created alot of         |  |
|       | hurdles for the gresment as well as        |  |
|       | for the people was a silling the           |  |
|       | Meanwhile environmental                    |  |
|       | degradation Creates already scarced        |  |
|       | them there are very limited resources      |  |
|       | on the easth and most of them              |  |
|       | are not re-usable Human acknowles          |  |
|       | degrade empromment and this degradation    |  |
