"21st century is the century of the technology; it shapes the destiny of the human beings by modernizing the political, economic, social and environmental progress in which women much endure it at all; it is only technology that enhances the empowerment of women through various practical paces; therefore, technology is only hope that brings the women from bottom to high level." Rajia Zalcia.

There is no denying the fact that technology is a sole hope of the development and prosperity for all the human being, especially for women empowerment in the modern era. Technology provides the underlying awareness about the basic women rights in the particular country and also strengthens the women participation in political and economic progress.

It stipulates self-dependency of the women through facilitating the modern-skill learning and empowers women towards minimizing gender discrimination society. Furthermore, technology promotes women protection rights in order to get down the gender violence in country; it modernizes the traditional culture of society or country with respect to women's practice towards the early marriage and honor killing. Technology ensures law and its practical implementation to grow the protection of women at workplaces and globe. Community also takes the help of technology to build the empowerment of women across the globe. It also sustains the importance of women's decision making power in the political, economic and

scale. Hence, ~~sole~~ of ~~technology~~ is not less than a ~~blessing~~ in the ~~modern~~ era.

To start with, the ~~sole~~ of ~~technology~~ is ~~the~~ ~~very~~ ~~imperative~~ aspect for ~~empowering~~ ~~women~~ politically and ~~economically~~. ~~Before~~ the era of ~~technology~~, the ~~existence~~ of ~~women~~ had been just the ~~worker~~ of the ~~house~~ and their ~~tasks~~ were limited at ~~her~~ ~~homes~~. They ~~used~~ ~~were~~ used for ~~bringing~~ ~~children~~ and ~~family's~~ ~~setting~~ ~~facilities~~.

According to ~~the~~ ~~WADAW~~, the ~~sole~~ of ~~technology~~ is ~~truly~~ noteworthy how it ~~empowers~~ the ~~participation~~ of ~~women~~ in ~~the~~ ~~global~~ ~~activities~~; almost 25000 million ~~women~~ involve in ~~using~~ of ~~technology~~. It is a ~~change~~ for all the ~~societies~~ in order to make ~~women~~ bold and ~~courageous~~.

~~Technology~~ ^{It} provides the basic awareness about the fundamental rights of women in the respective countries. Women have also @ enduring the hardships in the home, society and country and they are being deprived their basic rights that constitutions assign them. According to the Universal Declaration Human rights (UDHR/UNO), it gives the basic guideline to the signatory nations, ensuring the "Human Rights" in their countries. Since when the emergence of technology came ^{its} at peak, the awareness of the basic human rights are being rampantly promoted at the national level and global level.

The technology emphatically strengthens the women's participations in the political and

economic progress. Unfortunately, it will not ~~logically~~ ~~corroborate~~ ~~the~~ ~~state~~ that women mostly face the political and economic participation in the world. Technology ensures the participation of women in the two subjects that dominate in the globe. As per report of the UNDP, 48% women are incentivized through giving rise to economic and political rights by ~~the~~ the role of technology. Thus, technology opens the fortune door for women empowerment.

women learn the modern skills and advanced learning under the shadow of technology. Especially, the ~~eastern~~ **Eastern** countries are backwards in terms of technology and its accessibility. However, in the western countries, such as USA, Canada, France, Germany, UK and so forth. Technology

enables every woman with the modern learning and skills.

Skills and modern learning in the shape of digital marketing and freelancing and global online earning trends are being offered to women irrespective of their identity and nationality.

Technology empowers towards the less and minimizing the ~~the~~ ~~gender~~ ~~based~~ ~~violence~~ in a society. Without the robust tool of technology gender based violence is impossible to be wiped out of society. This is technology that highlights the gender based violence in the world. Technology is feasible to register and highlight the violence cases against women particularly and it also assists in solving the cases itself empowers the role

of women?" Raja Zakaria. A Women are completely inclined to engage with technology that plays a vital role to wipe out the (GDP).

Technology modernizes the traditional culture of a society and ~~women~~ considering women.

In the African countries and Asian countries, there are the some practices that have been prevailing for a long period of time. They use women as entity of the useful tool and living thing that can be brunt or misbehaved any time.

However, according to the European Union Women Wing (EUWW),

issued the guidelines and instructions that women and technology are the sides of one coin; they definitely aggrandize their correlation when they are treated equally. This step and

argument proved that without technology, women can not be empowered.

law and its true implementation to enhance the protection

Avoid writing in gossiping style.

of women across society and country is inclined to the technology. The role of technology is broad in realm of the law and its practical implementation to provide the women workers' protection.

In this era of technology, women are safe and out of those cases of circumstance that they encountered in the past. Women protection campaign of the global perspective wing, highlighting that any woman can work tirelessly and securely at the workplace because they are under the

scope of technology.

The role of technology is to monitorize the advanced education for women empowerment.

According to the ~~Ministry of~~ Ministry of Science and Technology, women are being incorporated in scientific education learning and training in which 39% women have been taking the fullauged assistance of technological equipments. Along with all the non-governmental organizations (NGOs) leave no stone turned to ensure technological accessibility for women.

Plz write in formal language

~~In the global level,~~
~~the participation of women~~
 in the global welfare organization is only feasible through the robust-
 role of technology. Many global organizations are working for

Women empowerment by utilizing the technology equipments. Dr Shamid Akhtar wrote in her book, Women are the technological empowering entity that they are only treated by the use of technology. Therefore, (UNO) and (Neros) are facilitating women by technology.

Inclusion of women

Technology can be utilized for empowering women by the prioritized agenda of global community. In the recent move of G7 summit of empowering the world and women, in which G7 countries, namely the super power countries, allocated 20 billion dollars for women empowerment by bringing the use of technology for women. They also realized that the role of technology is the authentic step that women

participation can be raised at the world level.

Technology gives the importance of women decision making power in economic, political and social scale.

~~These are two power~~ subjects that dominate and prevails in the global discussion that are political and economic decision making powers. Technology also brings women in the process of political and economic decision making power. Feminist Movements and global women summit use the technology as a tool, 'cumulating' the participation of women in the political and economic decision making power. The technology plays the game changing role in this development.

Technology portrays the campaigns and steps taken by global community in the favour of women empowerment. Last four years, global campaigns and steps that encourage the role of women took place of programs. In the case of Corona virus, the women were encountering the domestic violence and financial imbroglio in which technology underscored the situation of women and through it people commenced the campaigns. ^{due to it,} the role of technology is truly praiseworthy.

Along with it, the ~~artificial~~ ^{Artificial} intelligence under the shadow of technology is to strengthen the women empowerment in 21st century. Every one is reliant on the technology and

engages in the use of technology. Especially, women adopt the AI for graph, and job presentation by the pragmatic use of technology. According to the (AIMS) service, 27% women subscribed OpenAI-5th power generation to gain the benefits for basic requirements of living standard, it makes easy; everything can be accessible for women.

It establishes

~~Technology~~ sets up the cultural progress of the gender equality and non-gender discrimination in the society and countries. Unfortunately, everywhere in the world, the gender inequality and gender discrimination prevail, but the role of technology alter this tendency and culture.
 Technology is a sign of the

perfect program in managing the cultural, political and economic mantra in a country. John-F-Kennedy. Technology brings the changes and sets the valuable standard for women progress.

last but not least, technology also introduces the environmental rights of women and their growth. Climate change is increasing day to day and its bad aftermaths damage the women existence and birth rate. Due to it, the health condition of women suffers the most. European Union passed the bill and introduced the environmental rights of women that is due to technology. It becomes the voice of women empowerment and their growing the good health.

In conclusion, the role of technology can not be denied at any condition. It is the blessing for human development, especially for women empowerment. Technology has altered the destiny of women and has caused the development of women in this modern era. It strengthens the woman participation in the decision making politically and economically; it empowers women to take the living rights by raising their voice, taking the help of technology. Moreover, technology ensures laws and their practical implementation in order to enhance women protection at the workplace. It monitors the advanced education and skills for growth of women in a society; it awakes the

the global community for
carrying women rights in
accordance with the (UDHR)
charter. Technology is the
final destination for the
development of human beings;
they have made it their
light of the darkness for
pursuing the evaluation of
global village" Antonio Guterres -
