Mention the full qs statement for proper evaluation. Without that these are just notes and cannot be awarded marks Nuclear weapons pose an enormous theat to humanity Since their first use, different leaders and organizations have been trying to prevent proliperation to additional courteies. Despite their efforts, more states than ever have obtained nuclear proxes some up the critical actions and decisions that led to today's distribution of those weapons and the world's non-prolyeration 20 gime. History of Nuclear weapons: Nuclearization refers to the process by which a country or Region develops, acquires or establishes nucleae capabilities. 1938-62 (The Nuclear Age Begins) In the late 1930's new scientific discoveries made nuclear weapons a possibility. During World Was II, the United Stales and its allies were apraid that their entires would control nuclear weapon girst. Albert Enstein wrote a letter to President Franklin D. Roosevelt warning "The Germany might be working on a nuclear programme and usered the United States to start its own research

Programme. The letter was instrumental
in convincing the U.S. government to take the potential threat sociously, leading to the graphishment of the Advisationmentee on Uranium, which eventually evolved into the Manhattan Roject · Manhattan Project; As a result, they began to peoduce bombs under the Manhattan peoject, a secret research effort launched by the U.S. government in 1912. The success of the Manhatan peoject and the use of ractear weapons against Japan ushered in the nuclear age. In the afternath of world was I, The growing tensions between the nuclear - armed United States and the Soviet Union during the Cold Wal made the threat of nuclear was a · Aug 6, 1945 — Aug 9, 1945 First atomic bombs are desped on Hiroshima and Nagasaki In the fareth year of fighting byan in World War II, the United States deopped the first atomic bomb used in combat on Hiroshim , Japan ion August 6. This weapon killed more than we hurdred thou sand people. On August 9, the United States chopped a second bomb on Nagasaki

Day: 4 he development a nuclear weapons by both the U.S and USSR, led to to the concept of Mutualy Assured Destauction, where both enough nuclear up pons to ansure that any nuclear conflict would lead to the stal destruction of both the attacker and depender. This become the cornerations of cold was Nuclear proliferations Global Spreads Rollowing the U.S and USSR, other nations began developing nuclear weapons, including the United Kingdom, France and China. This shead a nuclear weapons, knowns as noble as proliperation regised concerns about global security and the potential of nucleae wal-Non-Proliferation Treaty (NPT In 1968, The Nuclear Non Proliferation Treaty was signed, with goal of preventing the spread of nuclear weapons, promoting disarmed, and facilitating the peaceful use of nucleas enealgy the treaty created emed states though some nations, such as India, istan, and Israel did not in the treaty and dove

Road to Nucleauization for Pakistana
Pakistan's acquisition of nucleae capabilities
strategic, security, and geop affical
factors particularly in exponse lo
regional riversies and percieved
threats. Here's a detailed look at
how Robertan developed 9ts nuclear
+ Initial Steps towards Nuclearization.
Pakistan's interest in nuclear technology
began soon after its independence in 1947.
+ India's Nuclear Program and Regional
Waldy:
Pakistan's deive to develop nucleae weapons was largerly in response to
Indian's Nucleae ambitions. In 1974,
India conducted its first nucleae
test, known as the "Emiling Buddha?
which was described as a peaceful
nucleae explosion" but signaled Indias
entry into the nucleae club.
* Security Concerns:
The 1971, Indo-Pakistan was, which
led to the creation of Bangladesh,
was a significant blow to Pakistan.
us Lessons from the fall of Dhakas
1. Separatist movement of Bangladesh
was provided legitimate by Indian
government by suporting launching
and giving neapons to them.
