

Labor-saving devices are more
troublesome than they
are worth

Outline:

A- Introduction

B- Arguments: Labor-saving devices are more
troublesome than they are worth:

① Economic disparity between those who
own machines and those who don't.

② Surge of unemployment due to
availability of machines.

③ Shift of workplace skills makes
manual workers marginalised

④ Less value of handicrafts

⑤ Lack of innovation and creativity
at ground level due to overdependence on
technology

⑥ Increase in health issues due to
less physical activities

⑦ Climate change as a profound threat
due to industrialisation

C - ~~Counterarguments~~: Labor-saving machines are more beneficial than they are troublesome.

① Increase in efficiency and productivity due to less human involvement.

② Improvement in quality of life due to effective machinery.

③ Reduction ⁱⁿ of gender disparities on the basis of physical work.

D - Rebuttal: **Make proper phrase for synthesis**

① Increase in mental health issues due to the sense of lack of purpose.

② ~~Disconnection~~ ^{from} the natural world due to over-dependence on machines.

③ Global-level disparity between under-developed and developed countries on the basis of industries.

E - Conclusion.
