AI: Pros & Cons.

Q: Write an Outline and Introductory paragraph on the given topic.

I. Introduction
   thesis statement

II. Crunch thesis

III. Pros of Artificial Intelligence
   (a) Automation of repetitive tasks
   (b) Accurate data-driven insights
   (c) Enhanced-decision-making
   (d) Health care advancements
   (e) Research and development in multiple fields

IV. Cons of Artificial Intelligence
   (a) Job displacement
   (b) Over-all dependence on technology
   (c) Privacy concerns
   (d) High costs installation
   (e) Ethical dilemmas

V. Ways to counter myriad challenges
   (a) Re-skilling and up-skilling
   (b) Balanced integration
   (c) STEM education initiatives
   (d) Transparent policies

VI. Conclusion

Plz write thesis statement here to better evaluate

Last december, I observed a child watching a native made by a watchman in our ... The dance of the flame fascinated him, but heat the felt stopped ... ... going too close, which was a safe response. "Mysterium tremendum et fascinans" (mysteries that we simultaneously admire and fear); theologian — philosopher Rudolf otto coined this phrase to describe the human response to the incomprehensibility of extraordinary phenomena that people encounter. This triggered the thought of Artificial Intelligence (AI), an invention unlike anything humans have created. From carrying out complex medical diagnoses, automation, accuracy to engaging in research and development, AI is fascinating. But there is another side to it as well, a power that can have hugely undesirable consequences

for people and the environment
Thus, a balanced and pragmatic approach is needed to overcome such menace well before time.

Try to have more solid and logically well connected things
