

Climate change Outline

Day: _____

1. Introduction:

1.1. Hook: One of the Questions in the climate change debate: Are humans any smarter than frogs in a pot? if you put a frog in a pot and slowly turn up the heat, it will not jump out. Instead, it will enjoy the nice warm bath until it is cooked to death. we humans seem to be doing pretty much the same thing.

(Jeff Goodell).

1.2. General statement: Climate change refers to a long-term change in the average weather patterns that have come to define Earth's local, regional and global climates.

1.3. Thesis statement: Climate change, driven largely by human

actions, is reshaping in the natural world and human societies. its impact is seen in rising temperatures, melting glaciers, extreme weather events, food and water insecurity, and the growing vulnerability of developing nations, making Urgent global action Necessary.
