- Lack in tourism.

Introduction :- In 50 years, the earth will not be same as it is today.

Climate change is a global issue but unfortunately, Pakistan is ranked among top ten countries which is facing climate change badly.

It is a serious threat which causes ~~a~~ better days, natural disasters like floods, earthquakes, volcanic eruptions.

This issue is threatening its agriculture system, infrastructure, water resources and human settlements.

Climate change driven by human activities like burning of fossil fuels, deforestation etc.

Though, climate change is likely to cause a severe impact on whole world but as for Pakistan

Moreover, the impacts of climate change are not evenly distributed - the poorest countries and people will suffer earliest and most.

(Noordhaus 1991; Stern 2006)
