

After the reaction given by India, it has become nearly impossible to reduce tensions among Pakistan & India, as Pakistan is already done with strong response.

Trump's statement of letting these neighbouring countries solve the issue on their own is a huge mistake. Only International pressure and mediation can help de-escalate the uprising sentiments which might lead to battle or full-fledged war.

India's instant accusation against it's neighboring Pakistan, has been a big diplomatic failure. Although, many countries including US, and Russia has condemned the attack, but Delhi hasn't recieved validation sought to counter Pakistan.

Notes:

Given the situation of crisis in the middle East and Trump's ^{deep} involvement there is the reason for Trump's ~~direct~~ ~~directly intervening~~ failure to intervene directly. But only the mediation by America or some strong allied nations ~~is~~ can be a solution. If these neighboring ^{countries} left on their own, and given public pressure and anger desparately rising, war is inevitable.

One main reason which can ignite the fire of war is Political Agenda of BJP. Moment after Pahalgham Incident, BJP's social media handles started posting things which can only fuel "Religious Extremism". Modi and its BJP work on agenda of "Protecting Hindus" and the "Pahalgham Attack" took lives of 24 Hindus out of 26 in total. So, in order

Notes:

to, protect Hindus' and their sentiments, Modi is likely to start a war. This will improve his image as "True Warrior" for Hindus.

Second reason which is on Pakistan's side is the "Water Issue". Suspension of "IWT-1960" is considered "an act of war" by Pakistan. Pakistan, which is already deadlocked in "Canals on Indus River" issue can't let this happen.

In conclusion, It is need of hour to stop these neighboring countries by means of mediation & International players ~~that~~ must play their part.

Notes:
