2.8 Sustainable environmental practices

2.8.1 Pollution control

2.8.2 Water management strategies

2.8.3 Eco-tourism

Conclusion

3.1 Summary of stated pathways

3.2 Importance of having multi-faceted approach and interdependence of pathways

3.3 Long-term vision for prosperity

3.4 Concluding thoughts.

The Essay

"There are many roads to prosperity but one must be taken. Inaction leads nowhere" - This is true because currently it seems like Pakistan is a land of challenges but it is a land of full opportunities ^{of potential}. Pakistan is the fourth largest population of the world with median age of just 21 years, has the perfect geo-strategic location and is envy of many nations in south Asia and across the globe. It is facing numerous challenges today such as lack of good governance, education and health facilities, water crisis, energy crisis and crumbling economy. All of these issues are interlinked and interdependent so we need to adopt a multi-faceted approach towards the to achieve prosperity. Through Effective governance, investment in Education, ~~HEP~~, technological infrastructure,

human development projects, by promoting inclusive growth and sustainable environmental practices, by ~~bringing~~ bringing in economic reforms and mitigation energy crisis we can make Pakistan a prosperous nation. By following these steps Pakistan can achieve sustainable prosperity - ~~that~~
