Introduction :- In 50 years, the earth will not be same as it is today.

Climate change is a global issue but unfortunately, Pakistan is ranked among top ten countries which is facing climate change badly.

It is a serious threat which causes hotter days, natural disasters like floods, earthquakes, volcanic eruptions.

This issue is threatening its agriculture system, infrastructure, water resources and human settlements.

climate change driven by human activities like burning of fossil fuels, deforestation etc.

M T W T F S S

Date _____

though, climate change is likely to cause a severe impact on whole world but As for Pakistan

Moreover, the impacts of climate change are not evenly distributed - the Poorest countries and people will suffer earliest and most.

(Nordhaus 1991; Stern 2006)

General suggestions:

Not a comprehensive outline

Try to avoid repeating your points

While giving your points make proper arguments

In the introductory paragraph start with a strong hook the summary of your outline and then conclusion it must be one paragraph don't divide in small paras... no need to write quote wherever you want... Try to follow the structure of Essay
