

Write a précis of passage given below with suitable TITLE”.

In the rapidly transforming world of today, humanity finds itself at a crossroads where technological innovations promise unparalleled convenience yet simultaneously threaten the traditional fabric of society. The ever-increasing reliance on artificial intelligence and automation has significantly reduced the need for human labor in various sectors, leading to concerns over widespread unemployment and economic inequality. Furthermore, the pervasive use of digital communication platforms, while enhancing connectivity, has inadvertently fostered isolation, eroded interpersonal skills, and contributed to a growing sense of alienation among individuals. Environmental degradation, fueled by relentless industrialization and consumerism, continues to compromise the planet's health, endangering not just biodiversity but the very future of human civilization. Yet, amidst these daunting challenges, there exists a glimmer of hope: a collective awakening toward sustainable living, ethical technology use, and a redefinition of success that values community well-being over mere material accumulation. Whether humanity rises to meet these challenges or succumbs to the consequences of its own creations will depend largely on the choices made in this critical juncture of history.

Comprehension Passage:

Success is often seen as the result of talent or luck, but in reality, consistent hard work and perseverance play a much larger role. History is full of examples where individuals, despite facing repeated failures, ultimately achieved greatness because they never gave up. Thomas Edison, for instance, conducted thousands of failed experiments before inventing the lightbulb. Similarly, J.K. Rowling faced numerous rejections before "Harry Potter" became a global phenomenon. These examples remind us that the path to success is rarely smooth. Challenges and setbacks are not signs to quit but opportunities to learn and grow. True success, therefore, belongs to those who are willing to persist when things get tough and who believe in their ability to improve through effort.

Questions:

1. According to the passage, what plays a larger role in success than talent or luck?
2. What does the passage say about Thomas Edison?
3. How many times did J.K. Rowling face rejection before succeeding?
4. What should challenges and setbacks be seen as, according to the passage?
5. Who does true success belong to, based on the passage?

Date: 28/4/2025

Day: Monday.

Precis Paragraph

"Humanity at a crossroad?"

In today's evolving world, technological advancements offer convenience but disrupt social structures, causing unemployment, inequality, and alienation. Industrialization and consumerism further threaten the environment and humanity's future. However, hope lies in a growing movement toward sustainability, ethical tech uses, and valuing community welfare over materialism. Humanity's fate hinges on the choices it makes at this pivotal moment.

Decent attempt.

Grammar and structure are ok.

Comprehension Passage

You are allowed to submit only one question in one pdf. The remaining questions may be submitted in separate pdfs.

Answers of the following questions

(i)

Ans: According to this passage, consistent hard work and perseverance play a larger role in success than talent or luck.

(ii)

Ans: Thomas Edison conducted thousands of failed experiments before inventing the light bulb.

(ii)

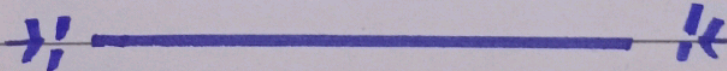

Ans: This admires the success of J.K. Rowling. J.K. Rowling faced numerous rejections before "Harry Potter" became successful.

(iv)

Ans: challenges and setbacks should be seen as opportunities to learn and grow.

(v)

Ans: In a passage, A true success belongs to those who persist during tough times and believe in self-improvement through effort.

Precis Paragraph

EMPOWERING SOCIETY THROUGH EQUALITY AND CARE

Society's advancement relies on providing education, healthcare and equal opportunities to all citizens. These social prospects empower individuals, foster unity, and prevent unrest. Inclusive development is vital for a just, prosperous and sustainable future.

Comprehension Paragraph

(i)

Ans: The main challenge discussed is climate change. It is affecting humanity on a global scale. Rising temperatures cause natural disasters. The passage stresses its urgent threat.

(ii)

Ans: These are the natural disasters are linked to rising temperatures like hurricanes, floods, and wildfires are linked to the increase in

global temperatures. The passage highlights how climate change fuels these events.

(iii)

Ans: Scientists believe human activities are the main cause. Especially, the burning of fossil fuels like coal and oil. These actions release gases that warm the planet.

(iv)

Ans: If no action is taken, the results could be catastrophic. Future generations would suffer greatly from the damage. The environment may become unstable and dangerous. The passage urges action to prevent this.

(v)

Ans: Countries are investing in renewable energy sources. They are promoting awareness among their citizens. They also join international agreements to cut emissions. Together, they work to protect the Earth.

Write a précis of passage given below with suitable TITLE”.

The advancement of society depends greatly on the social prospects offered to its citizens, particularly in areas such as education, healthcare, and equal opportunities. A society that invests in high-quality education empowers its people with knowledge and skills necessary for progress. Similarly, accessible healthcare ensures that individuals can lead healthy, productive lives. Furthermore, promoting equality, irrespective of gender, race, or economic background, fosters unity and reduces social tensions. Without these prospects, societies face growing disparities, unrest, and stagnation. Therefore, it is essential for governments and communities alike to prioritize inclusive development strategies that uplift every segment of the population, ensuring a more prosperous, just, and sustainable future for all.

Comprehension Passage:

Climate change is one of the greatest challenges facing humanity today. Rising global temperatures have led to more frequent natural disasters, such as hurricanes, floods, and wildfires. Scientists agree that human activities, particularly the burning of fossil fuels, are the main cause. If immediate action is not taken, the consequences could be catastrophic for future generations. Many countries are now investing in renewable energy, promoting environmental awareness, and working together through international agreements to reduce carbon emissions and protect the planet.

Questions:

1. What is the main challenge discussed in the passage?
2. What natural disasters are linked to rising temperatures?
3. What do scientists believe is the main cause of climate change?
4. What could happen if immediate action is not taken?
5. What are countries doing to fight climate change?
