Introduction

Pakistan

A- Causes of Climate Change in pakistan

2.1 Green house gases

2.1.1 . Burning fossil fuel

2.1.2 . Deforestation

2.1.3 . Forest fires

2.2 Natural Disasters

2.2.1 . Drought

2.2.2 . Floods and intense rainfall

2.2.3 . Earth Quake.

2.3 Industrialization

Industrialization

2.3.1 Industrial waste disposal.

B- Consequences of Climate change in Pakistan.

2.4 Rising temperature and weather changes

2.4.1 . Heat Waves leads to Severe health diseases.

2.5 Water Scarcity

2.5.1 . Glacier Melting

2.5.2 . Sea Level rise

Subject verb agreement mistake

2.6 Food shortage and economic losses.

Introduction:

A well known quot on Climate

change is from ~~António~~

Guterres, the UN Secretary-General;

"The era of Global warming has ended; the era of global boiling has arrived." ~~Climate change is~~

~~Change in global regional climate pattern. The~~

~~former~~ ~~UNFCCC~~ Convention on climate

(UNCSS), in its Article 1, defines

climate change as: "A change of Climate which is attributed directly or indirectly to human activity that alters the composition of the global atmosphere and which is in addition

to natural climate variability observed over comparable time periods". Pakistan

ranked among the top 10 countries world wide most affected by climate change. Unfortunately, there are some

Link this quote with the remaining para to bring coherence

Factors which causes climate changes in Pakistan, are Green house gases, natural Disasters, Deforestation, Floods, Drought and industrialization leading to rising temperature and weather changes, water scarcity and food shortage and economic losses.

Write precise summary of your outline in your introduction .

Properly conclude introduction with your thesis statement at the end

Take Grammer, spelling ,verb and proper noun into account while writing
