

## Topic: International organizations losing their credibility

Many years ago, 10 to 15 million people died in the deadly wars: World War I and World War II. There is no denying the fact that wars had affected the entire world.

Including innocent citizens, children and the friendly ecosystem. These disastrous events popped up due to the disgraceful behaviour of the authoritarian leaders. The absence of connectedness and harmony injured the world. The callousness of the dictators destructed not only humanity but also vanished the nature by using the poisonous chemicals and gases. Therefore, the global leader established international organization to stop these vandalism and atrocities and to maintain peace and harmony among the nations. The United Nation was the leading agency established in

1945, that was responsible to bring connectedness and tranquility after the world war II. There is no denying the fact that UN, WHO and other organizations secured success globally. For instance, the UN efforts in peacekeeping in the civil wars in Asia, Africa. Moreover, the establishment of UNHCR under UN brought numerous successful stories in the world. Besides, WHO had eradicated the smallpox virus and played vital role in reduction of other disease i.e poliovirus and malaria. However, the world has seen downfall in the efforts of International organization. Many experts reported that these organizations <sup>have lost</sup> their credibility. For instance the UN, that is responsible to maintain peace and bring interconnectedness among nations, failed to achieve the goal. The ongoing Israel and Palestine conflict has

never discussed attentively on global level. The Ukraine and Russia war entering into it's forth year. Moreover, Trump's tariffs ignored the WTO manifestation. Meanwhile, WTO has not arose any question on Trump's tariffs. There are numerous reasons behind the losing credibility of International organizations. Firstly the lack of interest of the global leaders i.e. America, China, Russia, and European countries. Trump has recently cut all aids for the WHO. The EU established their own NATO organization for their defence. Additionally, china and other regional countries focusing on regional organization i.e. SCO, BRICS, ECO rather surrender to International organizations. Secondly, the veto power supremacy hit the world severely. For instance, in the case of Israel Palestine.

conflict. America use veto powers to ~~favour~~ Israel. Russia ~~and~~ China followed the same supremacy in Russia Ukraine war. Therefore, the world must take notice of the veto supremacy. Thirdly, the emergence of multipolarism is another reason of diminishing the credibility of International organizations.

China, Russia, America and Europe now stand in parallel. And their egoistic behaviours challenge the credibility of International organizations. This can be seen in the case of tariffs. Trump and China retaliated on one another, ignoring the credibility of WTO while imposing tariffs.

Without knowing the consequences. Therefore, there is a need of review and it is a need of an hour that the world must sit together and evaluate the flaws and regulation.

They must bring strict rules  
and should establish an  
enforcement agency to  
curtailed the violation of the  
powerful nations.
