## Is The World Moving Towards World War III

There is no denying the fact that the world is facing chaotic situation since the emergence of 21st century. Different events has emerged in the last two to three decades, i-e invasion of Iraq **2003**, Russian seized crimes in **2014**, US invaded Afghanistan **2001**, Israel brutal behaviour towards Palestinian and the confrontation of US and China in trade war. These incidents have ramped up the possibilities of the world war III. There are other multiple reasons that ignites the occurrence of world war III.

Firstly, the weakening of the United Nation, the organization role has diminished due to several factors, the global leaders do not take interest in the world peace. The United nations that was made for the improvement of the world. As, the world has seen two brutal wars and loss of humanity, in the 20th century.

Meanwhile, the UN has played a pivotal role to prevent the world from further wars, conflicts and chaos. However, in the 21st century it seems useless and weak, because the Russian and Ukraine on going war has entered into its 3rd year.

Israel genocide is on the peak.

The silence behavior of UN shows the lack of interest in maintaining peace. It ramps up the risks of world war III.

Secondly, international law that was made to prevent violence and disturbance in the world. It has seen in the last decades that international law is no more strict law, that was made for creating harmony and peace. For instance, the

imperialistic US constantly violating international laws such as

imposing tariffs and advocating

for Israel genocide. Thirdly, the

most important cause that has

ramped up the risk of world

war III, is the blind nuclear

race among the countries. It was the time that only US and Russia were involved in nuclear race, now it has been reached upto 70% of the world. Asian, African and middle east countries has leaped into the race and has deplorably threaten the world.

Last but not the least, the presence of some hawkish and war mongering leaders like

For instance, the leader like Netanyahu, Trump, Putin has challenged the world and pulling the humanity into world war III by imposing their undefinable policies i.e Trump and Netanyahu want Greater Israel, Putin aims to capture Ukraine shuffled the world order.

So far, all these factors. **Are** contributing and increasing the possibility of world war III, however, there is still hope and optimism that has reduced the risks and fear of WWIII.

The most important factor that

stops the possibility of WWIII, is the nuclear power capabilities.

On one hand it deems as risk to the world but many times it has proven as a deterrence. For instance, the confrontation between India, Pakistan could not intensified due to the occurrence of nuclear.

In Kargil war, nuclear power was the only barrier that had avoided destruction. Secondly, globalization has been proven blessing in disguise because the phenomena has brought the world closer as a village.

For instance, the interconnectedness and dependency on one another gives a ray of hope to the world peace. Thirdly, the rise of economic alliances decrease the risk of any major war. Economic alliances ramp up the interdependency factor, therefore a nation that has strong economic ties will never dare to attack on the partner. For instance BRI has changed the fortune of the world.

Keeping all the factors in view, there is a dire need to introduce some revolutionary changes in the UN in order to make a vibrant organization that could play an effective role in the maintenance of peace in the world. Besides, the NPT should be implemented over the world. International law must be given supreme power that should be obeyed by developed and developing countries.

Regional organizations should be promoted to increase the interdependency factor in the world.
