4- Political stability

5- Investing in digital technology

6- Investing in human capital

7- Improving education and healthcare systems

## E- Conclusion.

"The greatest glory in living lies not in never failing, but in rising every time we fall." - (Nelson Mandela). It reveals that if any nation is struggling does not mean that it can not be prosperous. History witnessed that struggling nations rise even from ashes. Japan is one of the example which rose from ashes after world war II. Many countries are facing different challenges. Some of the countries successfully overcame those challenges while some of the countries are still struggling. Unfortunately, Pakistan is one of those countries. There is no doubt that Pakistan is facing many challenges on its way to prosperity but hope is always there and Pakistan is struggling hard to overcome these challenges and Pakistan will definitely be prosperous, if it but. It requires addressing several challenges and implementing strategic reforms - Pakistan is recently facing economic challenges, but the country can achieve sustainable growth if it avails the opportunities and overcome the challenges.

Your attention grabber is fine but try to write proper summary of your outline in the introduction.

Avoiding grammatical errors

Take proper Noun into account..

capitalize P of Pakistan
