

Importance of Greenary in Urban life

2024.

Greenary sites in urban cities serves place of relaxation and calmness in chaos of city life. Parks serve as bird sanctuaries, a place of community bonding, space for picnic & concerts, exhibition centres which defines its role not ~~as~~ only as aesthetic place but also urban development centre. Parks lessen urban heat island effect, stress and overall mental health issues. The real challenge is to create road side trees, parks, green rooftops to make urban life pleasing, enrich with experience ~~sound~~ of chirping of birds, along with life in concrete and glass.
