Climate Change in Pakistan

Causes and effects

Outlines

1. Introduction

1.1 Attention grabber

1.2 Background of Climate Change

1.3 Thesis Statement

2. Causes of Climate Change

2.1 Natural causes of Climate change

2.1.1 Geographical location of Pakistan

2.1.2 Glacial Melt

2.1.3 Temperature Cycle

2.1.4 Desertification and Soil Erosion

2.2 Domestic causes of Climate Change

2.2.1 Deforestation and Land Misuse

2.2.2 Urbanization and poor planning

2.2.3 Industrial and agricultural practices

2.2.4 Energy dependence on Non renewable resources

2.3 Global causes of Climate Change

2.3.1 Global Green House Gas Emission

2.3.2 Cross Border Pollution

2.3.3 Climate Justice Gap

2.3.4 International trade Pattern

3. Effects of Climate Change

3.1 Environmental Effect

- 3.1.1 Gl^{aci}al Melt and Flooding
- 3.1.2 Desertification and droughts
- 3.1.3 Biodiversity loss
- 3.1.4 Rise in sea level

3.2 Economic Effect of Climate Change

- 3.2.1 Agricultural Loss
- 3.2.2 Infrastructural damage
- 3.2.3 Energy Crisis
- 3.2.4 Livelihood Loss

3.3 Social Effect of Climate Change

- 3.3.1 Displacement and Migration
- 3.3.2 Health Crisis
- 3.3.3 Poverty Intensification
- 3.3.4 Food and Water Insecurity

3.4 Political Effects of Climate Change

- 3.4.1 Conflicts on Resource Allocation
- 3.4.2 Government Strain
- 3.4.3 Risk of Radicalization
- 3.4.4 Regional tension

3.5 Diplomatic Effect of Climate Change

- 3.5.1 Dependency on International Aid
- 3.5.2 Climate Justice Advocacy
- 3.5.3 Reputation and governance vulnerability
- 3.5.4 Global Trust issues

3.6 Conclusion

The Essay)

Introduction

Imagine a farmer in Sindh watching his crops wither under a scorching sun, while another in Khyber Pakhtunkhwa sees his field washed away by unprecedented floods. This is not fiction - It is Pakistan Climate reality. Pakistan, despite contributing only one percent in global greenhouse emission gas emissions - is ranked as one of the ^{ten} most climate-vulnerable countries of the world. Climate Change is a devastating phenomena which not only affects human life but also ~~have~~ ^{have} adverse effect on society. The most developed countries of the world have made ^{take} measures to control this devastating phenomena but the developing countries pay no heed to ~~address~~ ^{address} these issues. They are unaware that Climate change has power to ruin everything ^{for} which they are striving for. These countries while competing in the economic race ^{have} forget to address the most crucial issue that is climate change. Pakistan is one of those countries ^{that} are more prone to climate change. Climate change in Pakistan has ^{mainly} caused ^{due} to lack in ^{accountability} on national, domestic and global level which finally ^{asserts} ^{leads} to ^{bring} ^{about} adverse ^{environmental} economic, social political and ^{diplomatic} effects on the country.
