

Struggle against Cold Weather.

Day: _____

Date: _____

Countries at North Europe have much cold climate. The cold weather of these countries is unconquerable. It gives no space to exercise and training. Even in moderate cold temperature, a man is in struggle with weather but it is a hopeful struggle. In order to avoid worse impact of cold weather, a man has to build a strong house, and wear ~~thick~~ thick clothes. To provide fuel for fire, he should cut trees and dig out coal from the earth. He also needs food for survival. On the other hand, people of equator countries need little clothes. They are perfect and comfort in this situation. They can pass long day beneath the shade of a tree. These people need very less food compared to cold area people. All the people might experience the same differences at different seasons of the year.
