

**Write a precis of the following passage and suggest a suitable title.**

In the heart of bustling cities, urban green spaces stand as oases of tranquillity, providing respite from the hustle and bustle. Parks, adorned with vibrant flora, become havens for relaxation and recreation. The greenery offers a sanctuary for diverse wildlife, creating a delicate balance between urban development and environmental preservation. Beyond their aesthetic appeal, city parks play a crucial role in fostering community bonds. Families gather for picnics, friends engage in sports, and individuals find solace amidst nature's embrace. These communal spaces serve as venues for cultural events, open-air concerts, and art installations, enriching the urban experience. The benefits of urban green spaces extend beyond leisure. They contribute to improved air quality, mitigate the urban heat island effect, and promote overall well-being. Access to nature within city limits becomes a vital aspect of mental health, offering a refuge for introspection and rejuvenation. However, the challenge lies in balancing the increasing urbanization with the preservation of green spaces. Sustainable urban planning becomes imperative to ensure the coexistence of concrete jungles and natural havens. Efforts to create and maintain parks, tree-lined avenues, and green rooftops become integral components of shaping cities that prioritize both human and environmental health. As cities evolve, the preservation and enhancement of urban green spaces become a shared responsibility. The vision is to cultivate urban landscapes that seamlessly integrate nature into the tapestry of city life, fostering a sustainable and harmonious cohabitation between human progress and the environment.

(Q3) ?

Ans The greenery offers a wide range of benefits in urban cities because it creates a balance between urban development and environmental preservation. City parks play a crucial role in fostering community bonds. Where families gather for picnics, friends engage in sports, and so many other useful activities. Due to this, air quality will improve, mitigate the urban heat island effect, promote overall well-being. However, due to increasing population green spaces have been condensing. But efforts should be made to create and maintain parks, tree-lined avenues, and green rooftops for the well-being of humans and environment. The vision of urbanization should be made in view of environmental protection.

Title:- Save trees, Save environment.
