— x — x — x

Essay:

From the Melting peaks of the Northern Pakistan to the High rising sea levels of Karachi, With each summer feeling warmer than the last, whilst the monsoon rains destroying the cities infrastructure like butter, the climate change in Pakistan is redrawing the map of Pakistan with a force of Destruction. Pakistan as of this moment stands at a very risky position since all the climate changes are causing a severe setback be it environmentally, Economically or Socially. In the essay below we shall develop individually into what is causing such climate change and what consequences is it bringing to our country.

Apple Plant

Fill in the Blanks :

Reason 1: The Work was Physically Hard

↳ b: stacked them onto wooden skids
in tractor trailer

Reason 2: The pay

A = L → I was getting the minimum wage, plus
a quarter extra for night shift

Reason 3: The Working Condition

B → most of the time was spent outside on
the loading dock in near 0 degree temperatures
